10 Hot Tools for Creating and Editing Short Video

1 **Instagram's built-in video tool.** It allows you to film in sections so you can seamlessly join your edited video together in a professional way.

2 **Hyperlapse** is a clever tool by Instagram that allows you to create time-lapse videos. It allows you to condense longer videos for a short video effect—a speedy way to tell your story. Hyperlapse is perfect for behind-the-scenes videos and unboxing videos.

3 **Flipagram** is super-easy to use and helps bring your images to life to create beautiful short video stories. It's perfect for posting to Instagram or Facebook. Many people use the videos to give a shout-out to fans, review an event and more.

4 **Reflector2** Reflector is a wireless mirroring and streaming receiver for Android devices, iPhone, iPads, iPods, Computers and Chromebooks. It makes recording so much easy as you can see what your filming.

5 **Videohance app** This makes your videos look beautiful. It allows you to edit in real time on your phone by adding effects, borders, light leaks, text, music and more.

6 **Stop Motion** app is easy to use and so much fun. It allows you to create videos with the fun stop-motion technique. You can also check out Stop-Motion Lite. Both are available on iOS.

7 **Adobe Voice** focuses on the voice and turns your story into an animated video in minutes. Speak into the device to tell your story in short sentences or sections, then add animation, images, photos, sound and text. It's available for iPad.

8 **8mm** This low-cost app allows you to create old-fashioned 8mm movies in real time. The app is available for the iPhone and iPad.

9 **Cinemagram** allows you to animate one part of an image, which is a cool effect, and definitely one worth having in your tool kit.

10 **The iMovie app** is another in-phone editing tool you can use on the go. It has a lot of the popular features of the desktop iMovie program, allowing you to add audio, text and special effects from your phone.
